

SAUNAS

## Two Types of Wood, Two Distinct Options

Jacuzzi® infrared saunas are made with superior craftsmanship using the finest Grade "A" Western Red Canadian Cedar (Safe Cedar™) or North American Basswood. Each model is furniture quality and will enhance the look of any room.

Each distinctive wood, both available in our luxurious Premier and Sanctuary models, has unique characteristics that are sure to satisfy our customers varied tastes, preferences and health considerations. Whichever type of wood cabin you choose, be assured that each comes with a limited lifetime warranty for residential home use.

*Basswood, Sanctuary 3*

*Cedar, Premier IS-3*

### Basswood

Basswood, as it is more commonly known in North America, is a lightweight, high-quality wood whose color is white to a light brown throughout the grain of the wood.

- Knots and other defects are uncommon.
- It has a fine, even texture, natural luster and is considered remarkably easy to work with.
- Basswood is used in many applications where longevity and stability are required.
- Basswood is hypo-allergenic with a very low reactivity rating.

### Western Red Canadian Cedar

Grade "A" Clear Western Red Canadian Cedar is an exceptional wood for sauna use. Panels are color-matched and every surface is finished by hand.

- The soft red-brown timber has a tight, straight grain and few knots.
- Cedar is valued for its distinct appearance, aroma, and its natural resistance to decay.
- It serves as a natural fungicide and has properties that prevent the wood from rotting.

Jacuzzi® infrared saunas are 100% "Eco Certified," from the original tree to your finished sauna model.
