to Help You Feel Great and Live Well

PEAKLINE

CITYLINE

MYLINE

SWIMLINE

Bringing home the best in luxury European hydrotherapy begins at Orange County Pools & Spas. Featuring the offerings of the top European hot tub and swim spa manufacturer in the world, we know what it takes to transform your backyard into a haven of relaxation and recreation.

Whether you are looking for a backyard gym for premier aquatic fitness, a space for your whole family to gather, or a retreat in which to relax at the end of each day, you'll find all this and more at our showroom.

Finding the perfect model for your home couldn't be easier. Schedule your private consultation and test soak to try your favorite models before you buy. Wellis offers the premier PeakLine, midrange CityLine, and economic MyLine hot tubs for your enjoyment. Or, select a stunning swim spa for the ultimate in backyard recreation. You'll have all the space you need to swim, work out and relax.

**When only the best in aquatic amenities will do,
choose Orange County Pools & Spas.**

What Sets Wellis Apart

PRECISION EUROPEAN BUILD QUALITY & INNOVATION

POLI-MAX™ HOT TUB SHELL REINFORCEMENT

Increase the time you spend in your tub – without a hot water refill while also conserving energy. The Wellis shell reinforcement has excellent sound insulation properties and significantly reduces noise intensity through the tub wall – so the neighbors won't be bothered if you feel like taking a refreshing massage in the middle of the night.

1. Acrylic outer surface with antimicrobial treatment.
2. ABS polymer layer to further increase impact resistance and strength.
3. Medium density robotically applied polyurethane for added strength plus acoustic and thermal insulation.

REINFORCED MOLDED ABS FLOOR PAN

The insulated one-piece molded floor pan forms the foundation upon which your spa rests. The pan sides extend upwards and form a moisture and insect-proof barrier to protect the spa's structure from the detrimental effects of damp ground.

The reflective barrier insulation system extends across the floor pan to prevent valuable heat from being wasted.

POLYFOAM INSULATION

Proper insulation is just as important for hot tubs as it is for residential houses. The inside of your Wellis spa cabinet – down to the floor and on the side walls – is covered with a thick layer of polyfoam insulation, while the shell is coated with several layers of polyurethane foam which is well known for its excellent insulation properties. The heat from the pumps and the heaters is reflected by the foam to the inside of the shell, heating the cabinet and the water. This unique and high-quality insulation type makes every Wellis hot tub extremely energy efficient, saving you a lot of money, and ensuring that your hot tub is operated in an environmentally friendly way.

Energy Efficient Water Circulation

The W-EC circulation pump is a very low power consumption (190W/h) device which is available for all Wellis hot tubs as an option. The low power consumption (40% lower energy costs than a typical circulation pump), long lifespan, and almost silent running make this a very green and cost-effective option to consider.

WPS Cabinet Frame

No more sanding, oiling, and messy maintenance of a traditional timber cabinet. Wellis spa cabinets are made of a UV-resistant polymer material, that looks as good as real wood but is entirely maintenance-free. Immortality for the spa cabinet's frame! The special polymer ensures exceptional stability and life for the Spa's structural frame – protecting and extending the life of your investment even further.

Thermal Cover

Wellis manufactures its own covers to ensure consistent quality and the highest level of thermal insulation effectiveness. This helps to keep your energy costs to a minimum. The covers include features like a full-length hinge buffer seal, internal vapor seal, and a marine-grade UV-resistant outer cover. The top surface slopes like a house roof so that rain can easily run off.

Modern Relaxation

AquaSoul Sound System

The watertight elements installed in the Wellis AquaSoul™ sound system are of the latest design and highest quality. Any smart device equipped with a Bluetooth connection – e.g. a mobile phone, tablet or laptop – can be connected to the AquaSoul™ sound system.

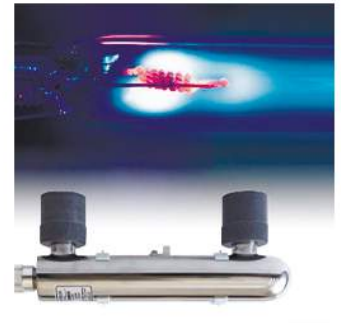

In.Touch 2 Smartphone App

Provides remote access via connection to your home's Wi-Fi network. Wellis Service can notify you when there is an error received from your hot tub and troubleshoot with access from the owner. Keep a history of your hot tub's operation and fix software errors remotely within just a few seconds avoiding service visits.

SmartTouch Control Panel

A multi-function color touch-screen hot tub control panel without buttons, keyboards, and covers, the new Wellis control panel is fun to use and easy to learn. It features a wheel menu selection, notification icons, Wi-Fi for remote hot tub control and music playback from other devices, and simple to navigate water treatment options.

UV-C Water Sanitization

UV-C rays are hypoallergenic and kill almost 100% of the viruses and bacteria found in water. The UV-C system from Wellis is lightweight, compact, and very effective. With a negligible amount of power consumption and quiet, safe, and automatic operation, it treats the water in the spa several times a day for crystal clear bathwater while reducing the need for use of water treatment agents.

Luxurious Comfort

FOUNTAIN JETS

2-3 fountain jets triple the fun and design in your Wellis spa. Enjoy the relaxing sounds of water bouncing on water or make family fun using the jets for games and more.

AROMATIC THERAPY

Bring your spa's capabilities to a whole new level when you enjoy the relaxing effects of aromatic infusions. With your Wellis spa, adding the power of your favorite fragrances to your hydrotherapy experience is easy and allows you to tailor every soak to suit your emotional and wellness needs.

MULTI-POINT MOOD LIGHTING

Exclusive color therapy lighting is built into the sidewall of the hot tub, directly under the water surface, consisting of 10-20 LEDs that are aligned with the standard underwater lighting. Color therapy lighting is also installed along the rim and in the side panel of the hot tub, which can be controlled separately from the inner lighting.

LIGHTED WATERFALL

In Wellis spas, color therapy means not only the exclusive LED lights in the shell, but also includes the light of diverters, waterfalls, and regulators. Sit under the cascading water and enjoy an ultimately soothing neck and shoulder massage.

Wellis

Wellis SwimLine

Rio Grande W-Flow

The perfect combination of a well-equipped hot tub and a dedicated swimming pool, the dual-zone Wellis Rio Grande W-Flow is truly the best of both worlds. Use your swim spa as a fitness machine for a complete workout. Or retreat to your separate, dedicated hot tub area for the epitome of hydromassage and relaxation.

Forty hydromassage jets deliver the best possible massage experience, while superfine filter inserts keep the water in the hot tub crystal clear. Three illuminated fountains and LED lighting allows you to create a relaxing ambiance.

The swimming part of the spa, equipped with a countercurrent system, has been completely redesigned. New software allows for a perfectly programmed swim experience. And with up to twice the water flow of other hot tub brands, you'll have a professional space to call your own. Add aquatic weights or expanders for a low-impact, high-result fitness experience. With the Rio Grande W-Flow, you can have it all.
