to Help You Feel Great and Live Well

**PEAKLINE**

**CITYLINE**

**MYLINE**

**SWIMLINE**

**Bringing home the best in luxury European hydrotherapy begins at Orange County Pools & Spas. Featuring the offerings of the top European hot tub and swim spa manufacturer in the world, we know what it takes to transform your backyard into a haven of relaxation and recreation.**

Whether you are looking for a backyard gym for premier aquatic fitness, a space for your whole family to gather, or a retreat in which to relax at the end of each day, you'll find all this and more at our showroom.

Finding the perfect model for your home couldn't be easier. Schedule your private consultation and test soak to try your favorite models before you buy. Wellis offers the premier PeakLine, midrange CityLine, and economic MyLine hot tubs for your enjoyment. Or, select a stunning swim spa for the ultimate in backyard recreation. You'll have all the space you need to swim, work out and relax.

**When only the best in aquatic amenities will do,  
choose Orange County Pools & Spas.**

# What Sets Wellis Apart

## PRECISION EUROPEAN BUILD QUALITY & INNOVATION

### POLI-MAX™ HOT TUB SHELL REINFORCEMENT

Increase the time you spend in your tub – without a hot water refill while also conserving energy. The Wellis shell reinforcement has excellent sound insulation properties and significantly reduces noise intensity through the tub wall – so the neighbors won't be bothered if you feel like taking a refreshing massage in the middle of the night.

1. Acrylic outer surface with antimicrobial treatment.
2. ABS polymer layer to further increase impact resistance and strength.
3. Medium density robotically applied polyurethane for added strength plus acoustic and thermal insulation.

### REINFORCED MOLDED ABS FLOOR PAN

The insulated one-piece molded floor pan forms the foundation upon which your spa rests. The pan sides extend upwards and form a moisture and insect-proof barrier to protect the spa's structure from the detrimental effects of damp ground. The reflective barrier insulation system extends across the floor pan to prevent valuable heat from being wasted.

### POLYFOAM INSULATION

Proper insulation is just as important for hot tubs as it is for residential houses. The inside of your Wellis spa cabinet – down to the floor and on the side walls – is covered with a thick layer of polyfoam insulation, while the shell is coated with several layers of polyurethane foam which is well known for its excellent insulation properties. The heat from the pumps and the heaters is reflected by the foam to the inside of the shell, heating the cabinet and the water. This unique and high-quality insulation type makes every Wellis hot tub extremely energy efficient, saving you a lot of money, and ensuring that your hot tub is operated in an environmentally friendly way.

### Energy Efficient Water Circulation

The W-EC circulation pump is a very low power consumption (190W/h) device which is available for all Wellis hot tubs as an option. The low power consumption (40% lower energy costs than a typical circulation pump), long lifespan, and almost silent running make this a very green and cost-effective option to consider.

### WPS Cabinet Frame

No more sanding, oiling, and messy maintenance of a traditional timber cabinet. Wellis spa cabinets are made of a UV-resistant polymer material, that looks as good as real wood but is entirely maintenance-free. Immortality for the spa cabinet's frame! The special polymer ensures exceptional stability and life for the Spa's structural frame – protecting and extending the life of your investment even further.

### Thermal Cover

Wellis manufactures its own covers to ensure consistent quality and the highest level of thermal insulation effectiveness. This helps to keep your energy costs to a minimum. The covers include features like a full-length hinge buffer seal, internal vapor seal, and a marine-grade UV-resistant outer cover. The top surface slopes like a house roof so that rain can easily run off.

Wellis SwimLine

# Rio Grande W-Flow

The perfect combination of a well-equipped hot tub and a dedicated swimming pool, the dual-zone Wellis Rio Grande W-Flow is truly the best of both worlds. Use your swim spa as a fitness machine for a complete workout. Or retreat to your separate, dedicated hot tub area for the epitome of hydromassage and relaxation.

Forty hydromassage jets deliver the best possible massage experience, while superfine filter inserts keep the water in the hot tub crystal clear. Three illuminated fountains and LED lighting allows you to create a relaxing ambiance.

The swimming part of the spa, equipped with a countercurrent system, has been completely redesigned. New software allows for a perfectly programmed swim experience. And with up to twice the water flow of other hot tub brands, you'll have a professional space to call your own. Add aquatic weights or expanders for a low-impact, high-result fitness experience. With the Rio Grande W-Flow, you can have it all.

**Dimensions: 19'8" x 7'8" x 4'9"**

**Hot Tub Zone:** 5 Seats + 1 Lounge  
with Two 3 HP Single-Speed Pump

**Swim Spa Zone:** Three x 3 HP  
Countercurrent Pumps

- 41 Jets with W-Flow System
- Aquasoul™ Pro 4.1 Speaker System
- TouchPad
- UV-C Sanitation System with Ozonator
- Color Therapy + 33 LED Lights
- Aromatherapy
- SmartPhone Control
- WiFi
- Bluetooth
- 1 Waterfall & 3 Fountains
- Swim Tether Included
